1. PROJECT OVERVIEW

The **Personal Finance & Budget Planner Dashboard** is an advanced Microsoft Excel project developed for financial data analysis, budget tracking, and dashboard visualization.

The project is designed to organize financial records systematically and provide meaningful insights using Excel tools such as Pivot Tables, Charts, KPI Cards, Conditional Formatting, Hyperlinks, and Formulas.

This dashboard helps users monitor income, expenses, savings, and budget performance through an interactive and user-friendly interface.

2. PROJECT OBJECTIVES

The main objectives of this project are:

- Track monthly income and expenses
- Analyze category-wise spending patterns
- Compare budget allocation with actual expenses
- Automate financial calculations using formulas
- Create interactive Excel dashboards
- Perform data cleaning and preprocessing
- Improve financial reporting and visualization
- Build a professional finance analytics system

3. SYSTEM STRUCTURE & WORKBOOK DESIGN

The project is divided into multiple worksheets for organized data management and analysis.

Interactive charts, KPIs and insights	Budget planning versus actual spending

Fig 1: Project Navigation & Welcome Interface

Workbook Structure

- Welcome Page**
 - Contains project title and hyperlink-based navigation system.
- Raw Data**
 - Stores original financial transaction records.
- Cleaning Tasks**
 - Contains all preprocessing and cleaning operations.
- Cleaned Data**
 - Stores processed and structured financial dataset.
- Dashboard**
 - Displays KPI cards, charts, and financial summaries.
- Pivot Tables**
 - Contains summary reports generated using Pivot Tables.
- Income Analysis**
 - Tracks monthly income trends and analysis.
- Expense Analysis**
 - Analyzes category-wise expenses and spending behavior.
- Budget Analysis**
 - Compares allocated budget with actual spending.

3. DATA CLEANING & PREPROCESSING

Before analysis, the dataset was cleaned and standardized using various Excel techniques.

Cleaning Operations Performed

Handling Missing Values

- Blank and unknown entries were identified and corrected.

Text Formatting

- Improper text cases and spacing issues were fixed.

◆ Data Validation

- Dropdown validation was used to avoid incorrect entries.

◆ Duplicate Checking

- Duplicate records were checked and removed.

◆ Standardization

- Category names and payment methods were standardized.

6. CORE FORMULAS USED

The data model processes an aggregate allocated monthly budget of **37,500** across all functional areas:

A. Expense Calculation Formula

```
=SUMIF('Expense Sheet'!$C$3:$C$500,'Budget Sheet'!A4,'Expense Sheet'!$D$3:$D$500)
```

Purpose:

Calculates category-wise expenses automatically.

B. Budget Status Formula

```
=IF(G4<0,"Over Budget","Within Budget")
```

Purpose:

Checks whether the remaining budget is positive or negative.

C. Total Income Formula

```
=SUM('Income Sheet'!$E$3:$E$500)
```

Result:

₹78,71,000

D. Total Expense Formula

=SUM('Expense Sheet'!\$D\$3:\$D\$500)

Result:

₹7,79,000

7. FINANCIAL ANALYSIS SUMMARY

The financial analysis section provides a detailed comparison between allocated budget and actual expenses across different spending categories. It also highlights income trends, expense patterns, and category-wise financial performance throughout the project dataset.

The dashboard includes the following components:

- Monthly Income Trend Chart
- Expense Category Analysis Chart
- Budget vs Actual Comparison Chart
- KPI Summary Cards
- Pivot Table Summaries
- Hyperlink Navigation System

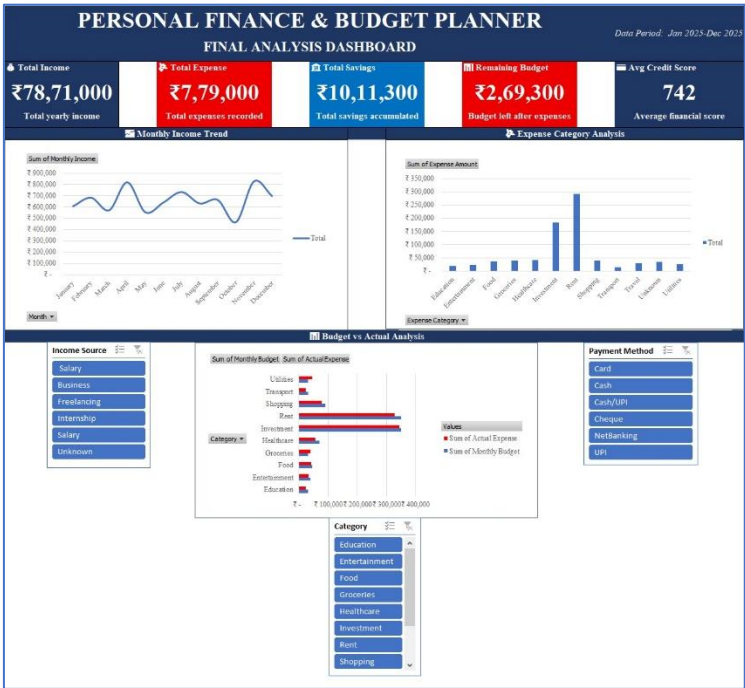

Figure 9: Expense Category Analysis Dashboard

10. KEY INSIGHTS

- Utilities and Groceries exceeded planned budget limits.
- Rent and Shopping maintained positive remaining balances.

- Overall financial status remained positive with savings of ₹53,700.
- Dashboard visualization improved expense tracking and reporting.

11. LEARNING OUTCOMES

Through this project, the following skills were developed:

- Advanced Excel Dashboard Development
- Data Cleaning & Preprocessing
- Pivot Table Analysis
- Formula Automation
- Financial Data Visualization
- Interactive Dashboard Design
- Hyperlink Navigation System

12. CONCLUSION

The Personal Finance & Budget Planner Dashboard demonstrates how Microsoft Excel can be effectively used for financial analysis, budgeting, and dashboard visualization.

This project successfully integrates data cleaning, Pivot Table analysis, formula automation, KPI tracking, and dashboard design techniques to create a structured and professional financial management system.

The project also improved practical knowledge of Excel analytics and real-world financial reporting techniques.
